

Waseda Study Hub

Helping students find the right people and the right place to study

Collab Team 5

Arkar (Project) · Nicholas (Frontend) · YJ (Frontend) · Sanchir (Backend) · Arron (Backend)

Problem (Overall Idea)

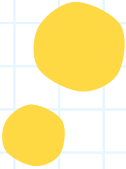

What problem are we solving?

Students want to:

- Find people studying the same course or topic
- Find good places to study on campus

Currently:

- Information is scattered
 - Hard to know who is studying what
 - New students don't know good study spots
 - Existing tools are not designed for studying
- 
- 

Our Solution

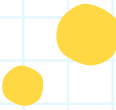

What is Waseda Study Hub?

A web-based platform that helps Waseda students:

- Find study buddies for the same course or topic
- Choose suitable study spots on campus

Two core concepts:

- **Study Buddy** → people
- **Study Spot** → place

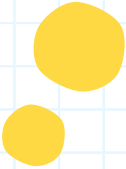

Target Users

Who is this for?

- Waseda undergraduate & graduate students
- International and exchange students
- Students preparing for exams or certifications
- Students who want to find good/new study spots

Optional:

- Upperclassmen who want to help juniors
- 
- 

Core Features

1. User Profile

- Name / year / major
- Courses or study topics
- Preferred study style (1 partner/as a group)
- Preferred study language

2. Study Buddy Finder

- Search students by course or topic
- Find upperclassmen who studied the course before
- See who is open to studying together

Core Features

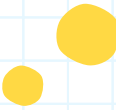

3. Communication

- Contact via:
 - Email
 - Instagram / Discord / LINE
- User chooses how to be contacted
- Privacy-respecting

4. Study Spot List

- Dynamic list of campus study locations
 - Users can recommend new locations
- Labels:
 - Quiet
 - Group-friendly
 - Casual
- Short descriptions

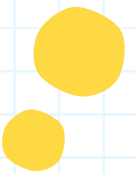

List of features such as distance to nearest convenience store/toilet, access to electrical outlet, private room, noise level/crowdedness etc.

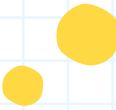

Optional/Future Features

Future possibilities

- Better matching filters
 - Availability time slots
 - In-app messaging
 - Notifications
 - Map view for study spots
- 

Tech Stack

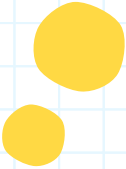

Frontend

- **Next.js**
- **TypeScript (JavaScript)**
- **Tailwind CSS**
- **HTML**
- **Figma**

Backend

- **Language: Python**
 - **FrameWork: FastAPI**
 - **Database: Google Cloud Firestore**
 - **Authentication: Firebase Auth**
 - **Testing: Postman**
- 

Timeframe and Development Plan

5–6 Month Plan

Month 1–2

- Requirements & design
- User profile & study buddy MVP

Month 3–4

- Study spot feature
- Filtering & search
- UI improvements

Month 5–6

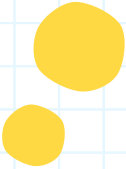

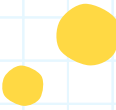

- Testing
- UX polish
- Add extra optional features
- Presentation & demo prep

Planned Regular Meetings

- **Weekly meetings every Thursday to catch up on progress**
